WORK EXPERIENCE

Senior Data Vis Designer

Sep 2018 - Present

Code For Africa - Lagos, Nairobi, Kampala, Dar es Salaam, Capetown

Roles: Design data visualizations, info-graphics, maps and other visual devices for CfA's storytelling and communication. Work with journalists and developers from across the continent to design and build engaging static and interactive visualizations and tools. Dive into the UI/UX of CfA's interactive websites and tools to bring them in line with User needs as well as emerging trends. Harmonize the look and feel of CfA's products, content and brands. Develop and maintain the team's design guidelines. Occasionally take part in training and community events as a trainer and help review courseware created to teach data journalism

Design Consultant

Jul 2019 - August 2019

Catholic Agency For Overseas Development (CAFOD) - Nairobi,

The Catholic Agency For Overseas Development (CAFOD) published a series of reports with the aim of bringing voices and examples from the ground into discussions about how to implement Agenda 2030 and the Sustainable Development Goals (SDGs) in a transformational way. The five reports are meant to help civil society organisations in their engagement with policy-makers at national and global level.

My role was to layout and format the information contained in the reports in a logical yet visually engaging way such that the different audiences for which the reports were intended, could easily navigate and consume the information therein on print as well as digital media.

Product Designer

Jun 2019 - Jul 2019

Data For Change - Nairobi,

My role in the Defy Hate Now project (a South Sudan based civic tech start-up combating the spread and impact of Fake news and other forms of Misinformation) was to develop the visual identity of SIFTA (Space for Ideas, Freedom, Transformation and Action) which was a multi-pronged initiative that developed interventions in Education, Policy, Technology and Strategic Partnerships with the objective of mitigating the impact of Fake News and Misinformation in fuelling conflict in South Sudan.

Apart from the initiative's branding I also developed the User Interface for the technology intervention which was a platform that leveraged data from social media as well as other sources to showcase the reach, engagement and factfulness of content shared on the various media platforms in South Sudan

Account Executive

Jun 2019 - Jul 2019

TulaSoft Creative Studios - Kisumu,

My role in the Defy Hate Now project (a South Sudan based civic tech start-up combating the spread and impact of Fake news and other forms of Misinformation) was to develop the visual identity of SIFTA (Space for Ideas, Freedom, Transformation and Action) which was a multi-pronged initiative that developed interventions in Education, Policy, Technology and Strategic Partnerships with the objective of mitigating the impact of Fake News and Misinformation in fuelling conflict in South Sudan.

Apart from the initiative's branding I also developed the User Interface for the technology intervention which was a platform that leveraged data from social media as well as other sources to showcase the reach, engagement and factfulness of content shared on the various media platforms in South Sudan
